### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**In the Abstract:**

On line 1, delete "to mitigate" and substitute with – mitigates—

On line 2, delete "allow" and substitute with –allows—

On line 3, delete ", is disclosed"

The above amendment has been made to comply the requirements of an Abstract that it avoid using phrases that can be implied. See MPEP 608.01(b).

2. The following is an examiner's statement of reasons for allowance: No prior art has been found to teach or suggest a method and system for providing adaptive rate selection in a DMT system such that the number of symbols in a Reed Solomon frame is determined from a specified number of redundant bytes and the level of impulse protection control, and the interleaver depth is determined in accordance with the number of symbols in the Reed Solomon frame and a specified data transmission rate of the channel.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cai (US 6,536,001) and Friedman (US 5,983,388) discloses a DMT communication using Reed-Solomon encoding and interleaving. Alamouti et al (US 5,838,728) teaches the depth of an interleaver should meet delay constraint.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
